

IPS87 Before 2015 and 7 Years Reality Check of Sustainable Development Goals in Africa

Osuolale Peter POPOOLA,PhD Mathematics and Statistics Department,Adeseun Ogundoyin Polytechnic, Eruwa. Oyo Stae Nigeria Wednesday 19 July: 10am-noon

OTTAWA 2023

64TH WORLD STATISTICS CONGRESS

What Are Sustainable Development Goals (SDGs)?

Overview of Africa Development Before 2015
Africa Development: 7 years After

What is SDGs?

S

In Septe 2015, the **United Nations** General Assembly formally adopted a new set of internationally agreed development goals (IADGs) tagged Sustainable Development Goals (SDGs) to be achiev by 22

The aim of the goals are Economic, Social and Environment al prosperity within planetary boundaries that leaves no one behind.

The SDGs are call for action by all countries to promote prosperity while protecting the planet. SDGs has 17 goals, 169 targets and 232 proposed indicators to show compliance

The implication of SDGs 2030 Agenda is that Africa's structural transformation must be anchored by the principles of sustainable development

All 193 countries have unanimously committed to adhere to and implement the SDGs throughout their 15-year lifespan, up to 2030. Hence, (SDGs) emerged as universally applicable for all countries and accounted for all aspects of

aspects of development – social, economic, and environmental.

The 17 SDGs

G1:NO Poverty:

- G3: Good Health and Well-Being
 - **G5: Gender Equality**
 - G7: Affordable and Clean Energy

Growth

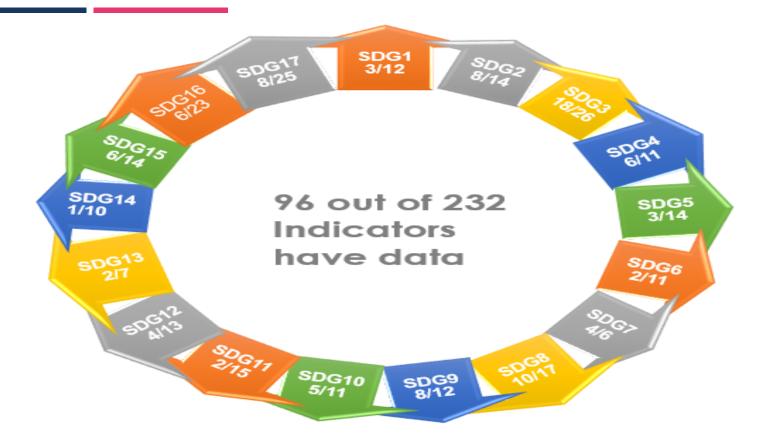

- G2: Zero Hunger:
- **G4: Quality Education**
- **G6: Clean Water and Sanitation**
- **G8: Decent Work and Economic**
- G9: Industry, Innovation and Infrastructure G10: Reduced Inequalities
- G11: Sustainable Cities and Communities G12: Responsible Consumption and Production
- **G13: Climate Action**
- G15: Life on Land
- Institutions
- **G17: Partnerships for the Goals**

G14: Life Below Water G16: Peace, Justice and Strong

17 Goals, 169 Targets and 232 Indicators

Africa Situation before SDGs

54 Countries: Low tax revenue to 228 Million In the Global Gross poor 1990 World: 37 - Iow Domestic Lowest tax & Human 56% of the Product Effort Development poor are in 410 Million in (GDP), Low Africa 2015 income trap: 28 countries are LICs

Just about 2% of global GDP

Africa before 2015 Continues...

 Average GDP growth is below the 5% per annum Average in Social inclusion **Africa** → 2nd most unequal region in world status → Education –enrolment good but slow on completion • \rightarrow Healthcare –Maternal mortality higher global average Only 40% of the SDGS indicators have data Only 50% of African countries have comparable surveys over last two decades Data Both indicator and methodology framework remain incomplete 22% of African nations have independent statistics offices

Africa Situation: Indicator 1

- In 2022, there was an estimated increase of between 119 million and 124 million people living in extreme poverty in Africa.
- Extreme poverty: Living on less than \$1.25 a day and largely affects women and young people.
- The COVID-19 pandemic,+ climate change +Political/Religion Conflict = Extreme Poverty e.g Mali, South Sudan, B/F, Nigeria, Somalia, Ethiopia
- Hunger has increasing from 8.4% in 2019 to 9.9% in 2022 (between 720 and 811 million people in Africa.
- In 2020, meaning that one in three people in Africa had little or no access to healthy food, ran out of food or went sometimes

davs without eating.

Africa Situation: Indicator 2

- The goals aim to end discrimination, violence and harmful practices against women and girls.
- Include providing women and girls access to equal opportunities in education and employment, universal access to sexual and reproductive health care and affirming women and girl's sexual and reproductive rights.
- Targets for this goal include affirming equal rights for all in legislation and practice, eliminating discriminatory laws and practices, increasing minimum incomes and uplifting migrants and developing countries.
- In Africa, nearly one in five women (736 million) have experienced sexual or physical violence since the age of 15.
- The Situation is yet to reduce

Africa Situation: Indicator 3

- These SDGs_focuse on reducing pollution, conserving marine ecosystems, managing unregulated fishing and investing in marine science and technology to further study and protect our oceans
- Africa is not on track to meet the <u>Paris Agreement</u> target of limiting global warming to 1.5 degrees Celsius and reaching net-zero CO2 emissions.
- To meet these goals global CO2 emissions need to be reduced from 2010 levels by at least 45% by 2030 and reduced to net-zero by 2050.
- In addition, the world must prepare for climate-related changes and disasters.
- Sadly, overfishing, land-based pollutants, plastic pollution and sewage runoff are a few human effects that threaten the health of the ocean and marine ecosystems.
- Africa are not fully on track

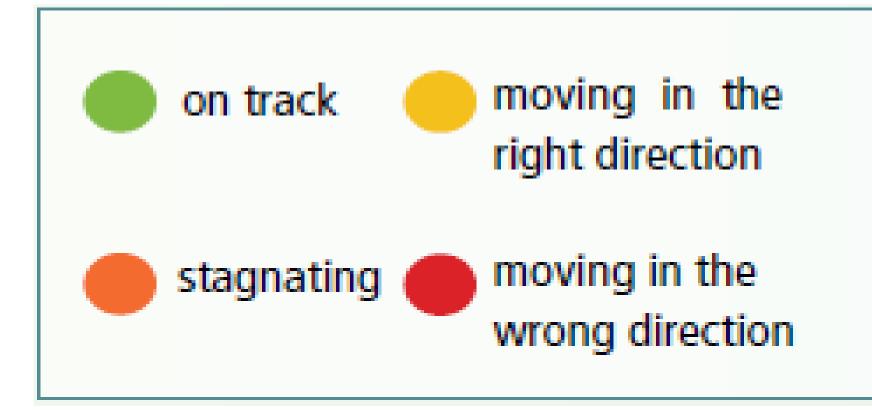

SDGs and Africa Sub Continents

7 Years After...

THANK YOU.
